journal of MEMBRANE SCIENCE

Contents

Determination of various hydraulic resistances during cross-flow filtration of a starch grain suspension through inorganic membranes
M. Ousman and M. Bennasar (Dakar, Senegal) 1
A technique for the study of the fouling of microfiltration membranes using two membranes in series
Y. Xu-Jiang, J. Dodds, D. Leclerc (Nancy, France) and M. Lenoel (Strasbourg, France) 23
Spinning of modified poly(2,6-dimethyl-1,4-oxyphenylene) into gas separation hollow fibers and assembling of prototype separators
A. Nardella, C. Demofonti, R. Santarossa, R. Sisto and C. Valentini (Roma, Italy) 31
Selective separation of Ga^{3+} through membrane impregnated with *N*-octadecanoyl-*N*-phenylhydroxylamine
H. Okushita (Hirakata, Japan) and T. Shimidzu (Kyoto, Japan) 43
Pervaporation of cyclohexane/cyclohexanone/cyclohexanol mixture through polyoxyethylene grafting nylon 6 membrane
H. Okushita (Hirakata, Japan), M. Yoshikawa and T. Shimidzu (Kyoto, Japan) 51
A new technique for quick production of ammonium paratungstate (APT) crystals by a liquid membrane
X.D. Wang, B. Zhu, Y.H. Wan and X.J. Zhang (Guangzhou, China) 55
Effects of reactant loss and membrane selectivity on a dehydrogenation reaction in a membrane-enclosed catalytic reactor
Y.V. Gokhale , R.D. Noble and J.L. Falconer (Boulder, CO, USA) 63
Performance of poly(vinyl alcohol) thin-gel composite ultrafiltration membranes
R.H. Li and T.A. Barbari (Baltimore, MD, USA) 71
Preparation and separation properties of silicalite composite membranes
C. Bai, M.-D. Jia, J.L. Falconer and R.D. Noble (CO, USA) 79
Effects of temperature and pressure on gas permselection properties in asymmetric membranes
D. Wang, K. Li and W.K. Teo (Singapore, Singapore) 89
Properties of new inorganic membranes prepared by metal alkoxide methods Part I: A new permselective cation exchange membrane based on Si/Ta oxides
H. Ohya (Yokohama-shi, Japan), R. Paterson (Glasgow Scotland, United Kingdom), T. Nomura (Yokohama-shi, Japan), S. McFadzean (Glasgow Scotland, United Kingdom), T. Suzuki (Kofu-shi, Japan) and M. Kogure (Machida-shi, Japan) 103
Study of membrane morphology by image analysis of electron micrographs
Q. Wu and B. Wu (Beijing, China) 113
The dynamics of diffusion and gel growth during nonsolvent-induced phase inversion of polyethersulfone
A.J. McHugh and D.C. Miller (Illinois, USA) 121
On the gas permeability of hydroxyl terminated polybutadiene based polyurethane membranes
S.-L. Huang and J.-Y. Lai (Taiwan, Taiwan) 137
An experimental study for the development of a qualitative membrane cleaning model
M. Bartlett, M.R. Bird and J.A. Howell (Claverton Down, Bath, United Kingdom) 147
Meeting announcements 159
Meeting calendar 161
Mathematical analysis of ethylbenzene dehydrogenation: Comparison of microporous and dense membrane systems
E. Gobina, K. Hou and R. Hughes (Salford, United Kingdom) 163
Separation of CFC-12 from air by polyimide hollow-fiber membrane module
I.-J. Chung, K.-R. Lee (Chunchon, Kangwon-do, South Korea) and S.-T. Hwang (Cincinnati, OH, USA) 177
Effect of dispersed phase on reducing concentration polarization
M.G. Parvatiyar and R. Govind (Cincinnati, OH, USA) 187
Pore size distribution effects on electrokinetic phenomena in semipermeable membranes
S. Saksena and A.L. Zydney (Newark, DE, USA) 203

Coupled transport of Zn(II) through a supported liquid membrane containing bis(2,4,4-trimethyl pentyl) phosphinic acid in kerosene. I. A model for the rate process involving binary and ternary complex species
S.B. Kanungo and R. Mohapatra (Orissa, India) 217
Coupled transport of Zn(II) through a supported liquid membrane containing bis(2,4,4-trimethylpentyl) phosphinic acid in kerosene. II Experimental evaluation of model equations for rate process under different limiting conditions
S.B. Kunungo and R. Mohapatra (Orissa, India) 227
Development of a novel photochemical technique for modifying poly(arylsulfone) ultrafiltration membranes
H. Yamagishi, J.V. Crivello and G. Belfort (Troy, NY, USA) 237
Evaluation of photochemically modified poly(arylsulfone) ultrafiltration membranes
H. Yamagishi, J.V. Crivello and G. Belfort (Troy, NY, USA) 249
Effects of aging on the gas permeability and solubility in poly(1-trimethylsilyl-1-propyne) membranes synthesized with various catalysts
K. Nagai and T. Nakagawa (Tama-ku, Kawasaki, Japan) 261
Organic "template" approach to molecular sieving silica membranes
N.K. Raman and C.J. Brinker (Albuquerque, NM, USA) 273
Carrier-mediated transport of platinum(IV) through a supported liquid membrane impregnating an 8-quinolinol derivative
J. Fu, S. Nakamura and K. Akiba (Sendai, Japan) 281
Newly developed ceramic membranes for dehydration and separation of organic mixtures by pervaporation
R.W. Van Gemert and F. Petrus Cuperus (Wageningen, Netherlands) 287
New selective perstraction system with charged membrane
Y. Isono, K. Fukushima, T. Kawakatsu and M. Nakajima (Ibaraki, Japan) 293
